SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Sir:

Pursuant to 37 C.F.R. §§ 1.56, 1.97 and 1.98, Applicant hereby submits an Information Disclosure Statement for consideration by the Examiner.

I. LIST OF PATENTS, PUBLICATIONS, AND OTHER INFORMATION

The patents, publications and other information requested to be considered by the Office (except unpublished U.S. patent applications) are listed on Form 1449 attached hereto.

II. COPIES

A. ☐ Submitted herewith is a legible copy of (i) each U.S. patent application publication and U.S. and foreign patent; (ii) each publication or that portion which caused it to be listed; (iii) for each cited pending U.S. application, the application specification including the claims, and any drawing of the application which caused it to be listed including the claims directed to that portion; and (iv) all other information or that portion which caused it to be listed.

B. ☐ Any patents, publications or other information which are listed on Form 1449 or on the copies of PTO-892, but which are not enclosed herewith, were

previously cited by or submitted to the PTO in one of the following applications which has been relied upon for an earlier filing date under 35 U.S.C. § 120:

U.S. Serial Number

U.S. Filing Date

C. ☒ Because the present application was/is being filed after June 30, 2003, no copies of the U.S. patents or U.S. patent application publications which are listed on the attached Form 1449 are enclosed pursuant to the waiver of 37 C.F.R. § 1.98(a)(2)(i). Any foreign patent documents or non-patent literature listed on the attached Form 1449 are enclosed herewith.

D. ☐ This is a PCT application in the entry of the National Phase in the United States. A copy of the International Search Report is attached for the Examiner's information. The documents listed on the International Search Report are listed on the attached Form 1449 for consideration by the Examiner and for listing on any patent resulting from this application. Since the International Search report was from the US, EPO, or JPO search authorities, copies of these references should have been supplied to the USPTO under the trilateral agreement and are believed to be in the file of the above-identified application. (MPEP 1893.03(g).)

III. CONCISE EXPLANATION OF THE RELEVANCE (check at least one box)

A. ☒ Except as may be indicated below in (B), all of the patents, publications or other information are in the English language (concise explanation not required).

B. ☒ A concise explanation of the relevance of each patent, publication or other information listed that is not in the English language is as follows (see 37 C.F.R. § 1.98(a)(3)):

1. ☐ See the attached foreign patent office communication from a counterpart foreign application:

2. ☐ English translations are provided:

3. ☒ Other:

German Patent No. DE1037956 generally relates to a container for screwdriver bits with a plurality of holes or pockets (2) for receiving drill bits (1), which holes or pockets (2) are separated from each other by elastically deformable walls.

German Patent No. DE1059368 generally relates to a container for storing drill bits, which container comprises shell housing portions (2), each pivotably connected to a block (1) comprising three rows of holes for receiving drill bits.

German Pat. App. P2008963.8 generally relates to a bit container with a diagonal bar (34; 36) in each of the pivotable housing portions (24, 26), wherein the diagonal bars (34; 36) are provided to prevent the drill bits from falling out of the holes of the container when the container is turned upside down.

German Pat. No. 2461766C3 generally relates to a container for drill bits and the like, which container comprises three inserts (14, 16, 18) having holes (20) for receiving drill bits. The inserts (14, 16, 18) are pivotable about a common axis (28, 30) which, however, is not the hinge axis.

German Pat. No. 3837829C1 generally relates to a container with three inserts (3, 4, 5) pivotable about a common axis (10).

German Pat. App. 19611301C2 generally relates to a container with three inserts pivotable about a common axis.

German Pat. No. 19612149C1 generally relates to a container for storing elongate products like drill bits.

German Pat. No. 1895600 generally relates to a container for tool bits having two pivotable lid members (9, 10) with one lid member (10) provided with knurled lateral portions (11) to facilitate opening of the container.

German Pat. No. 7721646 generally relates to a bit container having a bottom housing part (10) and a lid (12) as well as two inserts (16, 18), each pivotable about its own axis (34) and coupled with each other and coupled with the lid (12) so that opening of the lid moves the inserts (16, 18) to an upright position.

German Pat. No. 8304781.6 generally relates to a bit container with an arrangement of pivotable inserts (4).

German Pat. No. 8514919.5 generally relates to a bit container disclosing the combination of three inserts (4, 5, 6) pivotable about a common axis which, however, is not the hinge axis of the housing portions (1, 3) and a diagonal bar (Fig. 1).

German Pat. No. 8314923.6 generally relates to a bit container which comprises a pivotable insert (3) for receiving drill bits or the like and which cooperates with a diagonal bar (8) designated as a drill bit stop. However, it is

not disclosed whether the pivot axis of the insert (3) is coaxial with the hinge axis of the container portions (1, 2).

German Pat. No. 9310875.3 generally relates to a tool bit container having a magazine (11) for receiving the tool bits and a lid (12) pivotably connected to the magazine (11). According to the characterizing part of claim 1, the pivot connection of the magazine (11) and the lid (12) is chosen so that in the open state of the container the magazine (11) and the lid (12) form an X-shaped stand. Such a structure is of no interest.

German Pat. No. 29618465U1 generally relates to a tool bit container having a lid (2) and a container portion (3) pivotably connected by means of a hinge arrangement (7). In the container portion (3) two sets of tool bit inserts (12a, 12b) are provided, each pivotable about an axis (14).

German Pat. No. 29710394U1 generally relates to a tool bit container having an insert (4) with holes (20) limitedly pivotable with respect to the container portion (1) of the housing.

German Pat. No. 29913188U1 generally relates to a tool holder container, in particular for drill bits, having a front wall portion (2) and a rear wall portion (3), which are movable between a closed position and an open position, as well as a storing device (4) for tool bits.

German Pat. No. 215290 generally relates to a bit container having three inserts (3, 4, 5) pivotably mounted within the lid (2)

European Pat. No. 0199080 generally relates to a bit container having inserts pivotable about different axes (31; 41) and a diagonal bar (16) provided within the container portion (10) of the housing.
